

## LIST OF TABLES

<b>Table 1.</b> Autotransplants for non-Hodgkin lymphoma, age ≤ 20 years
<b>Table 2.</b> Autotransplants for non-Hodgkin lymphoma, age > 20 years
<b>Table 3.</b> Autotransplants for Hodgkin disease, age ≤ 20 years
<b>Table 4.</b> Autotransplants for Hodgkin disease, age > 20 years
<b>Table 5.</b> Autotransplants for acute myelogenous leukemia, age ≤ 20 years
<b>Table 6.</b> Autotransplants for acute myelogenous leukemia, age > 20 years
<b>Table 7.</b> Autotransplants for acute lymphoblastic leukemia, age ≤ 20 years
<b>Table 8.</b> Autotransplants for acute lymphoblastic leukemia, age > 20 years
<b>Table 9.</b> Autotransplants for multiple myeloma
<b>Table 10.</b> Autotransplants for neuroblastoma
<b>Table 11.</b> Autotransplants for testicular cancer
<b>Table 12.</b> Autotransplants for the central nervous system tumors, age ≤ 20 years
<b>Table 13.</b> Autotransplants for the central nervous system tumors, age > 20 years
<b>Table 14.</b> HLA-identical sibling transplants for chronic myelogenous leukemia
<b>Table 15.</b> Alternative donor transplants for chronic myelogenous leukemia
<b>Table 16.</b> HLA-identical sibling transplants for acute myelogenous leukemia, age ≤ 20 years
<b>Table 17.</b> HLA-identical sibling transplants for acute myelogenous leukemia, age > 20 years
<b>Table 18.</b> Alternative donor transplants for acute myelogenous leukemia, age ≤ 20 years
<b>Table 19.</b> Alternative donor transplants for acute myelogenous leukemia, age > 20 years
<b>Table 20.</b> HLA-identical sibling transplants for acute lymphoblastic leukemia, age ≤ 20 years
<b>Table 21.</b> HLA-identical sibling transplants for acute lymphoblastic leukemia, age > 20 years
<b>Table 22.</b> Alternative donor transplants for acute lymphoblastic leukemia, age ≤ 20 years
<b>Table 23.</b> Alternative donor transplants for acute lymphoblastic leukemia, age > 20 years
<b>Table 24.</b> HLA-identical sibling transplants for myelodysplastic syndrome
<b>Table 25.</b> Alternative donor transplants for myelodysplastic syndrome
<b>Table 26.</b> HLA-identical sibling transplants for non-Hodgkin lymphoma
<b>Table 27.</b> Alternative donor transplants for non-Hodgkin lymphoma
<b>Table 28.</b> Allogeneic transplants for Hodgkin disease
<b>Table 29.</b> HLA-identical sibling transplants for multiple myeloma
<b>Table 30.</b> Alternative donor transplants for multiple myeloma
<b>Table 31.</b> Allogeneic transplants for severe aplastic anemia, age ≤ 20 years
<b>Table 32.</b> Allogeneic transplants for severe aplastic anemia, age > 20 years
<b>Table 33.</b> Allogeneic transplants for Fanconi anemia
<b>Table 34.</b> Allogeneic transplants for thalassemia
<b>Table 35.</b> Allogeneic transplants for SCID
<b>Table 36.</b> Allogeneic transplants for inherited disorders of metabolism
<b>Appendix.</b> Abbreviations
